### **ABOUT ME :**

Aspiring front-end web developer and software engineer passionate about building dynamic and innovative web sites and apps for solving real life problems. I build efficient and dynamic solutions using modern tools like React.JS and Node.Js and also use generative AI to optimize time efficiency

### **SKILLS AND TECH USED:**

**Languages:** C, C++, JavaScript

**Frontend:** HTML, CSS, React

**Backend/Tools:** Node.js, Git

**Soft Skills:** Communication, Teamwork, Project Management

### **EDUCATION:**

**Jis College Of Engineering Kalyani:** Btech CSE 2022-26

**Shatavisha Public School Haripal:** 12th Grade 2022

**Don Bosco School Bandel :** 10th Grade 2020

### **PROJECTS:**

**1. MarketMe:**

A React-based platform for startups to find marketing agencies.  
Built dynamic frontend and completely mobile friendly.

**2. Vayosa Studios:**

A portfolio website for a design studio with modern UI/UX and easy navigation.  
Collaborated on design and deployment.

**3. PG Life:**

Full-stack app for PG listings (React, DB integration).

**4. Amazon Clone:**

Static web page mimicking Amazon's layout (HTML/CSS).

### **CERTIFICATIONS:**

1. Full Stack Web Development Training By Internshala
2. NPTEL Soft Computing
3. Web Development Training By Acmeград
4. "Discover your research potential with IEEE Xplore" Seminar by IEEE
5. Basics Of Programming Java, C++, PHP By Udemy

### **HOBBIES**

1. Listening to music
2. Video Games and mechanics
3. Reading books
4. Cooking
